

Vaccinations: What do the experts *really* say?

"The only safe vaccine is a vaccine that is never used."
- Dr. James A. Shannon, former director of the NIH

"There is no evidence that any **influenza vaccine** thus far developed is effective in preventing or mitigating any attack of influenza. The producers of these vaccines know that they are worthless, but they go on selling them, anyway."
- Dr. J. Anthony Morris, former director of the Virus Bureau of the US Food and Drug Administration

"Two or three years ago there was a **rash of positive HIV** and hepatitis patients in Baltimore among people who would otherwise not be expected to have a positive test. When studied all of these people had received the **influenza vaccine** four to six weeks prior and this was rapidly covered up by the press."
- Dr. Eva Snead, Feb 2000

Jonas Salk, inventor of the first polio vaccine, testified before a Senate subcommittee that "nearly all polio outbreaks since 1961 were caused by the **oral polio vaccine**."

"Many here voice a silent view that the **Salk and Sabin Polio Vaccines**, being made from monkey kidney tissue, has been directly responsible for the major increase in **leukaemia** in this country."
- Dr. F. Klenner, MD

"If vaccines are so effective in preventing disease why have epidemics occurred around the world following mass vaccination programs? In the Philippines for example, 'after ten years of compulsory inoculation against **smallpox** (25 million shots) over 170,000 got smallpox and 75,000 deaths were recorded between 1911 and 1920.'
- Townsend Letter for Doctors, Feb/Mar 1994

"Early in this century, the Philippines experienced their worst **smallpox** epidemic ever after 8 million people received 24.5 million vaccine doses; the death rate quadrupled as a result."
- Dr. William Howard Hay's address to Congress in 1937

"Official data shows that large scale vaccination has failed to obtain any significant improvement of the diseases against which they were supposed to provide protection."
- Dr. Albert Sabin, developer of oral Polio vaccine

"There is no evidence whatsoever of the ability of vaccines to prevent any diseases. To the contrary, there is a great wealth of evidence that they cause serious side effects."
- Dr. Viera Scheibner

"The incidence of **asthma** has been found to be five times more common in **vaccinated children**."
- The Lancet, 1994

"This report describes six mothers who received **live virus vaccines** and one who received a Hepatitis B vaccine during pregnancy after having received an MMR booster five months prior to conception. All the children who resulted from these pregnancies have had developmental problems, **six out seven (85%) were diagnosed with autism, and the seventh seems to exhibit symptoms often associated with autistic spectrum disorders**."
- Dr. F. Edward Yazbak, MD

"Every day new parents are ringing us. They all have the same tragic story. Healthy baby, child, teenager, usually a boy, given the **DPT** (diphtheria, pertussis and tetanus) or **DT** (diphtheria and tetanus), **MMR** or **MMR booster** followed by a sudden fall or slow, but steady **decline into autism** or other spectrums disorder."
- The Hope Project (Ireland)

"My suspicion, which is shared by others in my profession, is that the nearly **10,000 SIDS deaths that occur in the United States each year** are related to one or more of the **vaccines** that are routinely given children. The pertussis vaccine is the most likely villain, but it could also be one or more of the others."
- Dr. Robert Mendelsohn, MD

"**Vaccination** is not necessary, not useful, does not protect. There are twice as many casualties from **vaccination** as **AIDS**."
- Dr. Gerhard Buchwald, Germany, internal disease specialist and participant in more than 150 vaccination trials

"When we give government the power to make medical decisions for us, we, in essence, accept that the state owns our bodies."
- Ron Paul, MD, US Congressman and physician

"For a paediatrician to attack what has become the 'bread and butter' of paediatric practice is equivalent to a priest denying the infallibility of the pope."
- Dr. Robert Mendelsohn, MD

"Unthinking respect for authority is the greatest enemy of truth."
- Albert Einstein

* Did you know that the first vaccine ever, smallpox vaccine 150 years ago, sparked a smallpox pandemic which *killed hundreds of thousands*? Likewise, did you know that the infamous Spanish flu which killed over 20 million people worldwide, was sparked by an American vaccination program and that the only countries unaffected were those that opted OUT of the vaccination program?? Hmmm?

* Did you know that in recent polls, a **third** of UK nurses now say they will **NOT** get vaccinated... and *another third are still unsure*? And likewise in Canada, more and more nurses and doctors polled will themselves likewise **REFUSE** to get jabbed? www.theflucase.com (search 'nurses')

* Did you know that all vaccine suppliers have **legal immunity** from any death or damage caused by their vaccines?

* Did you know that the world's governments including the US have **signed over their sovereignty** to the WHO in a time of 'crisis'? And are you aware that the US and Europe fully intend to militarily enforce the lethal injections to be mandated this fall?

Vaccine Ingredients: Partial List

For full list, research & 'drill-down' details, see: www.novaccine.com/vaccine-ingredients

- **Aborted human fetal tissue (human diploid cells)** - vaccines are grown upon aborted human fetuses
- **Aluminum hydroxide** - directly linked to causing Alzheimer's disease
- **Aluminum phosphate** - directly linked to causing Alzheimer's disease
- **Ammonium sulfate** - an inorganic chemical compound used as fertilizer and "protein purifier"; known to cause kidney & liver damage, gastrointestinal dysfunctions
- **Amphotericin B** - an "antifungal disinfectant" and antibiotic, which damages the urinary tract, bowels, and heart functions
- **Animal tissues** (a causal element for all the various auto-immune diseases associated with vaccination): **horse blood, rabbit brain, dog kidney, monkey kidney, chick embryo, chicken egg, duck egg, pig blood, Porcine (pig) pancreatic hydrolysate of casein.** (The pig protein/tissue is an additional objectionable issue for Jewish and Muslim people)
- **Calf (bovine) serum & fetal bovine serum** - cow blood is recognized as a significant transmitter of Mad Cow Disease
- **Betapropiolactone**
- **Formalin** - contains formaldehyde
- **Gelatin** - obtained from selected pieces of calf & cattle skin
- **Gentamycin**
- **Glycerol**
- **Glutaraldehyde** - industrial water treatment chemical
- **Hydrolyzed gelatin**
- **Monosodium glutamate (MSG)** - an excitotoxin, now known to cause cancer in humans, also linked to obesity
- **Neomycin (anti-biotic)**
- **Neomycin sulfate (anti-biotic)**
- **Phenol red indicator (carbolic acid)** - a highly toxic disinfectant dye, attributed to liver, kidney, heart & respiratory damage
- **Phenoxyethanol (antifreeze)** - proven to have extreme neurotoxic side effects

- **Polyethylene glycol** - a binding agent and thickener for latex and paints
- **Polymyxin B**
- **Polysorbate 20**
- **Polysorbate 80** - associated with infertility, cancer and sense organ dysfunction when injected
- **Residual MRC5 proteins**
- **Sorbitol**
- **Sucrose**
- **Thimerosal (mercury)** - a neurotoxin linked to psychological, neurological, & immunological problems—especially autism. Nervous system damage (such as sub-acute sclerosing panencephalitis (SSPE), brachial plexitis, post-vaccinal encephalitis, transverse myelitis and peripheral neuropathies), kidney disease, birth defects, dental problems, mood swings, mental changes, hallucinations, memory loss, and inability to concentrate can occur. Symptoms also include tremors, loss of dermal sensitivity, slurred speech, and—in rare cases—even death and paralysis. This additive alone was the catalyst for another recent Class Action Lawsuit organized by mothers of children born with autism & the many related behavioral disorders associated with it. Autism is now occurring at levels never seen before in history; depending on the state, its rate is now 1 in 67 to 1 in 150. The autism rates used to be 1 in 20,000. Mercury may also be associated with the significantly increased rates of senility and Alzheimer's, which is associated with five or more successive flu vaccinations. Although most mercury (thimerosal) has been removed from children's vaccines, it is still in all flu vaccines at toxic doses.
- **Tri(n)butylphosphate**
- **VERO cells, a continuous line of monkey kidney cells** - linked to the SV-40 virus known to cause leukemia
- **Washed sheep red blood cells**
